

MUHAMMAD ZEESHAN FAROOQ

DevOps Engineer | Cloud & Platform Engineering

Lahore, Pakistan | +92 349 8776860 | zeeshanfarooq139@gmail.com | [linkedin.com/in/muhammadzeeshanfarooq](https://www.linkedin.com/in/muhammadzeeshanfarooq)

PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with 3+ years of experience building, operating, and scaling cloud-native platforms across AWS and GCP. Specialized in Kubernetes-based infrastructure, containerized microservices, and Infrastructure as Code, with a strong focus on high availability, automation, and cost optimization. Gold Medalist in Computer Science from COMSATS University Islamabad.

EXPERIENCE

DevOps Engineer — Venturenox

March 2023 – Present

- Containerize and maintain microservice-based applications using Docker with multi-stage builds for optimized, secure images.
- Design, deploy, and operate Kubernetes workloads across AWS (EKS) and GCP (GKE) for multiple production projects.
- Provision and manage cloud infrastructure using Terraform across multi-cloud environments.
- Implement Kubernetes best practices including auto-scaling, high availability, and resource optimization.
- Build and maintain CI/CD pipelines for fast, reliable, and automated deployments.
- Drive cost optimization through resource right-sizing and cluster efficiency improvements.
- Implement monitoring and observability using CloudWatch, Prometheus, Grafana Alloy, and Tempo for improved system visibility.

Cloud Engineer (Intern) — Venturenox

November 2022 – February 2023

- Containerized applications using Docker with multi-stage builds and managed multi-container setups with Docker Compose.
- Deployed containerized workloads on Kubernetes (Minikube, GKE) and managed resources using Helm charts.
- Provisioned cloud infrastructure using Terraform in a reproducible and automated way.
- Built CI/CD pipelines using GitHub Actions to automate build, test, and deployment processes.

KEY PROJECTS

Testfuse — AI-Driven Personality Insights Platform

- Designed and provisioned AWS infrastructure using Terraform across preview, staging, and production environments.
- Implemented CI/CD pipelines with GitHub Actions and Drone CI for automated, reliable deployments.
- Deployed and managed applications on EKS using Helm charts, ensuring scalability and consistency across environments.
- Configured ephemeral preview environments per pull request to accelerate feature development and review cycles.
- Integrated monitoring and alerting using Prometheus and Grafana to maintain platform observability and uptime.

Levy — Workflow & Client Management Platform

- Managed production-grade Kubernetes infrastructure on EKS, ensuring high availability and reliable application delivery.
- Implemented GitOps-based continuous delivery using Argo CD, enabling predictable, sprint-based deployments.
- Configured Kubernetes Ingress with TLS termination using Cert-Manager and Cloudflare for secure external access.
- Set up centralized logging and distributed tracing using Grafana Loki, Tempo, and Alloy for full-stack observability.
- Managed Drone CI pipelines for staging and production workflows, including ECR image lifecycle management.

Infergram — AI-Powered Meeting Engagement & Audience Intelligence Platform

- Designed and provisioned cloud infrastructure on GCP using Terraform for a real-time computer vision and NLP platform.
- Deployed and managed containerized microservices on GKE using Helm charts to support real-time engagement analysis workloads.
- Built and maintained CI/CD pipelines to automate build, test, and release workflows for rapid AI model iteration.
- Configured monitoring and alerting using Prometheus and Grafana to maintain reliability under real-time processing demands.

SKILLS

Cloud & Platform: AWS, GCP, High Availability, Disaster Recovery, Cost Optimization
Containers & Kubernetes: Kubernetes (EKS, GKE), Docker, Helm, Multi-Tenant Clusters
Infrastructure as Code: Terraform, Ansible, GitOps Workflows
CI/CD & Release: GitHub Actions, GitLab CI/CD, Drone CI, Argo CD
Observability: Prometheus, Grafana, Loki, Tempo, Pyroscope, OpenTelemetry, CloudWatch
Scaling & Performance: Karpenter, KEDA, ELB, Cloud Load Balancing
Security: HashiCorp Vault, Cloudflare Tunnels, Trivy
Scripting: Bash, Python, YAML

EDUCATION

Bachelor of Science, Computer Science — COMSATS University Islamabad *Feb 2019 – Feb 2023*
Gold Medalist
